

Exercise #2: "Getting to Know U(RL)" (10 points)

Due Week 4

Exercise Brief

Create a simple, multi-page website with a consistent navigation interface as a way of introducing yourself to the rest of the class. The pages should be organized so that there is one webpage for each of the following prompts:

Your name (`my-name.html`)

Your ASCII logo, as either a JPEG or PNG image, or simply as text characters (`my-ascii.html`)

A list of a few brief details about your educational or professional background (`my-background.html`)

A designer or design studio that inspires your work (include an anchor link to their website and some images of their work) (`design-inspiration.html`)

An image and description of a non-designed object that you admire (it is up to you to interpret what a "non-designed" object might be), and why you like it (`non-designed.html`)

An "everyday" design object that most people use or encounter on a regular basis

that you think is not adequately appreciated
for its design qualities ([everyday-
object.html](#))
