

My book **of**  
Elements **and** Principles

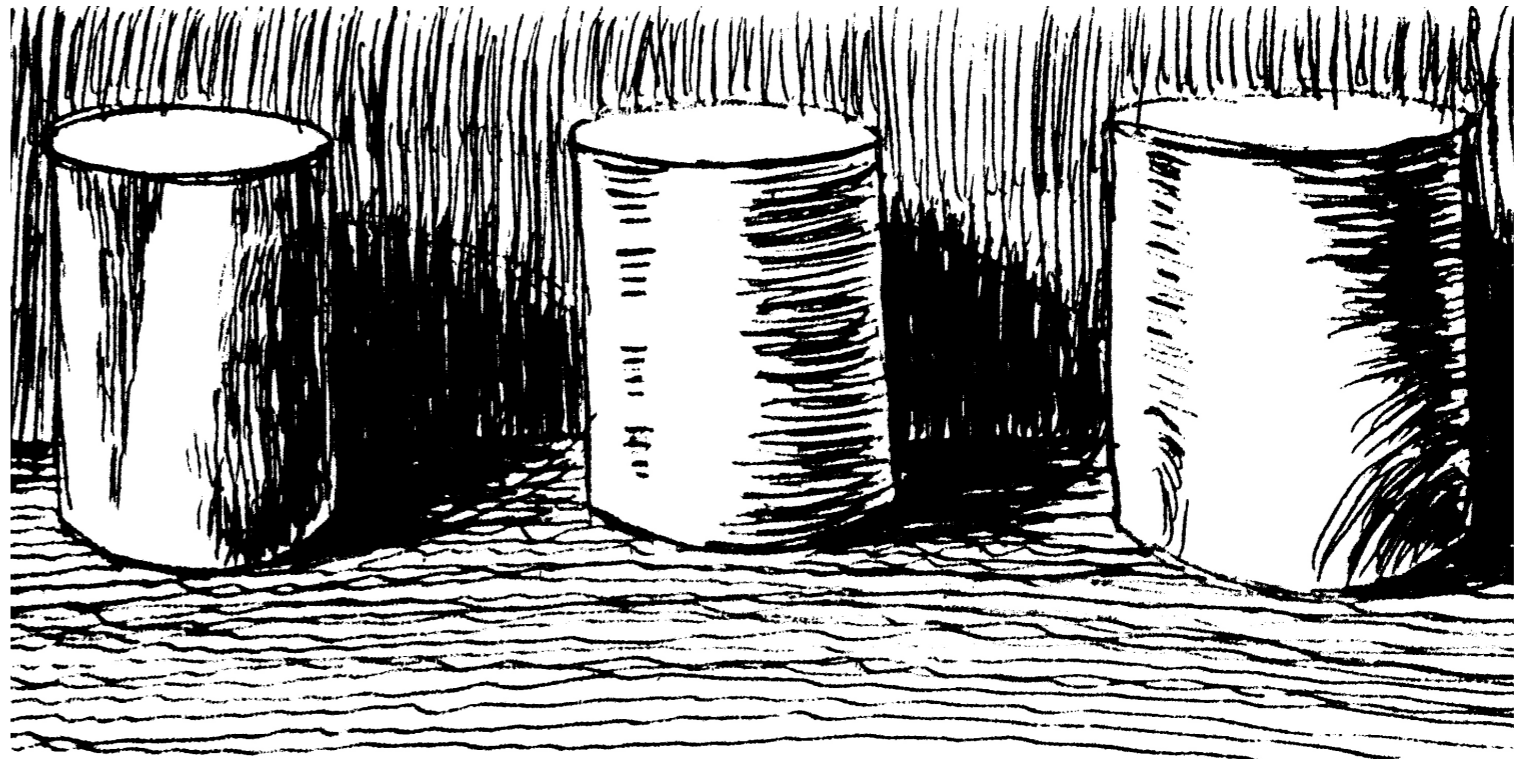

Joanna Guevara  
Graphic Design 2

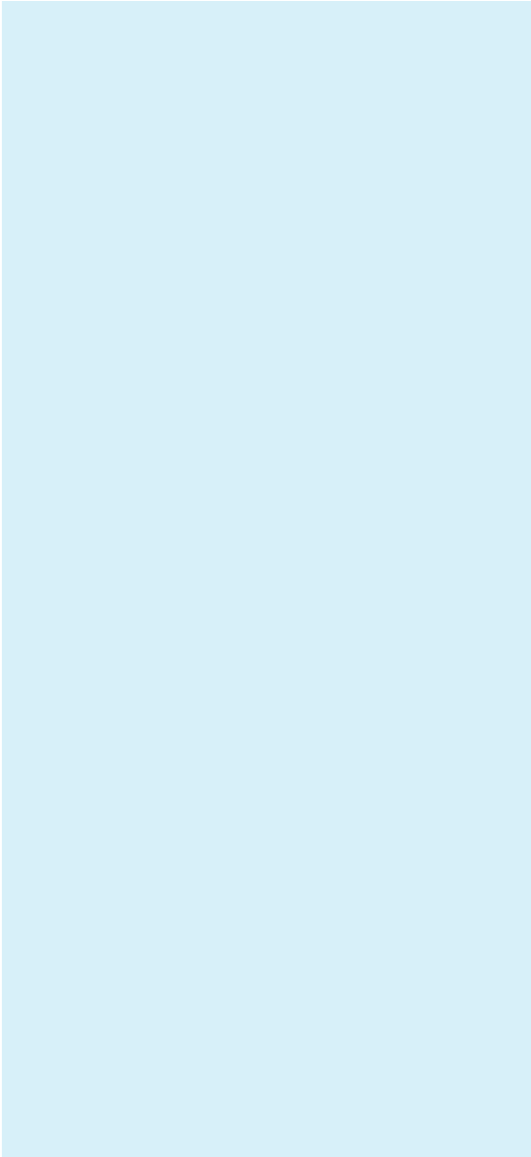

In this image we can see thick, calm, and agitation lines that give a sense of emotion and direction.

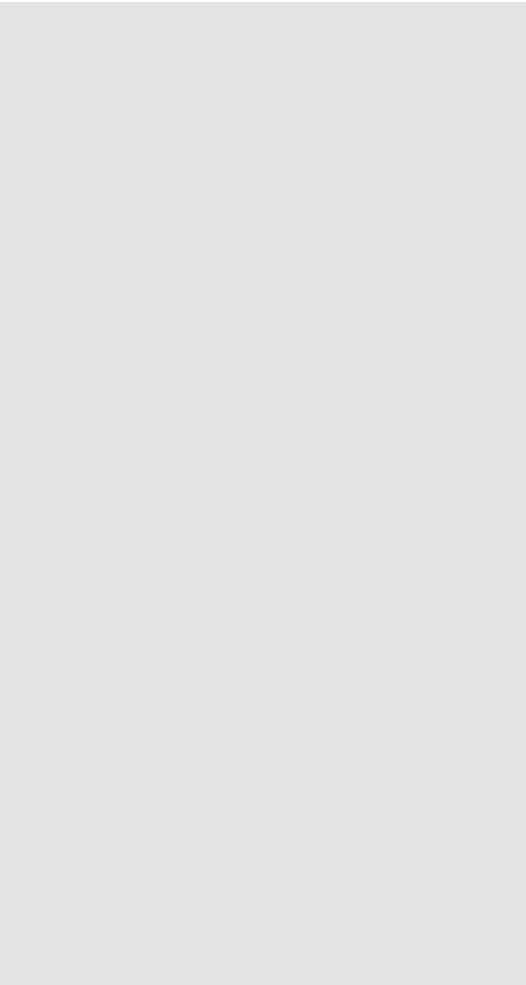

ELEMENTS / PRINCIPLES

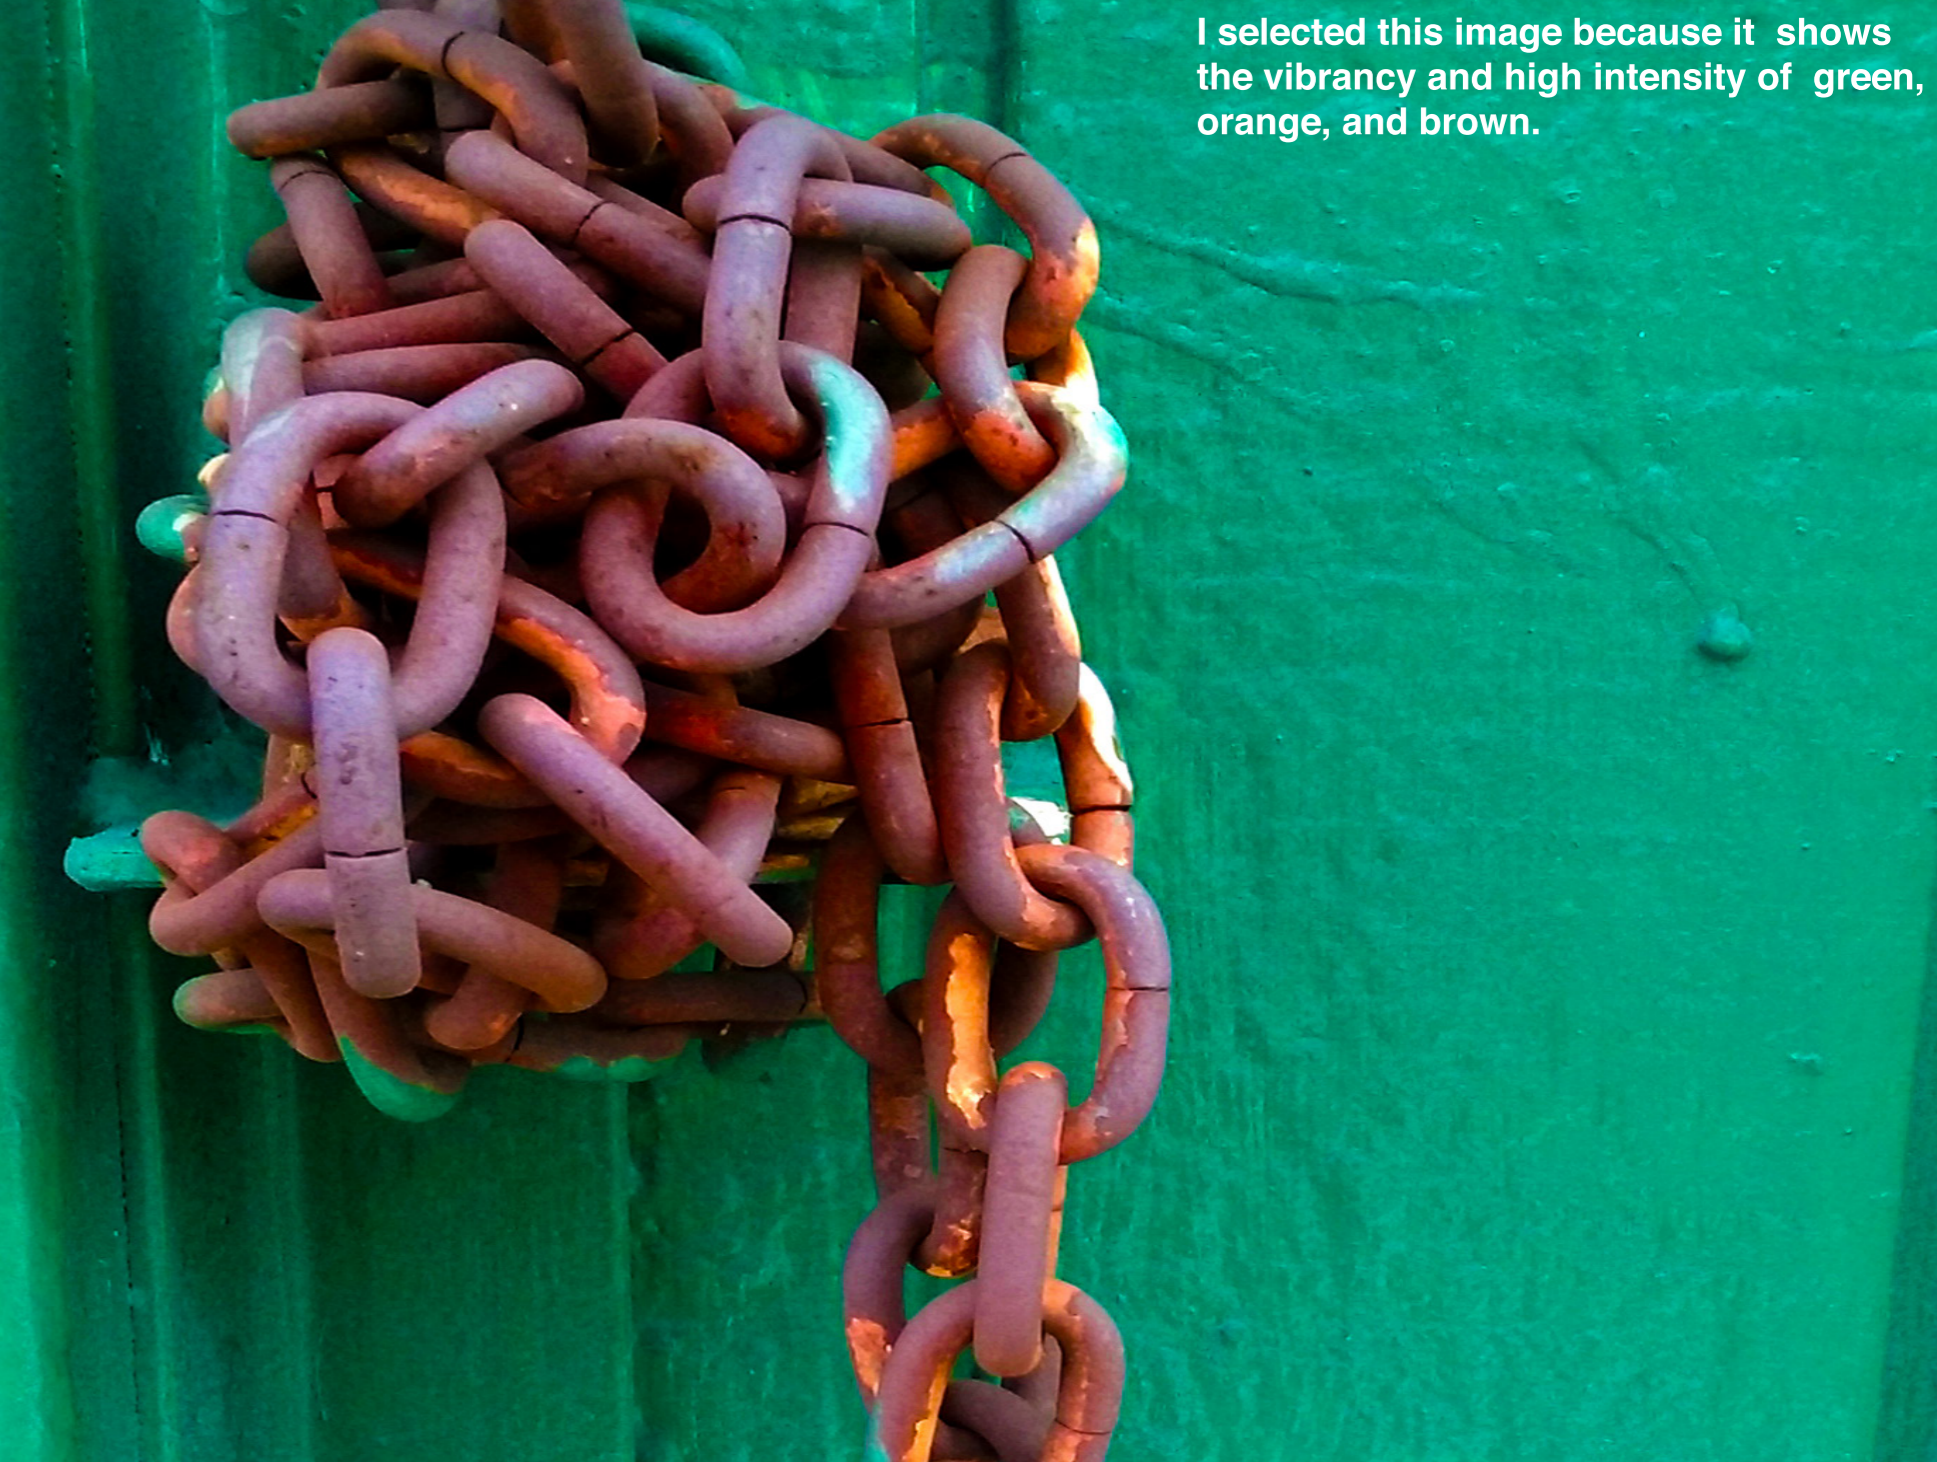

This is a drawing I made of a shape in hatching. I selected this image because it shows the edges, width,height, and depth of a cylinder shape.

In these photographs I focused on capturing rough, bumpy, and smoothness of tactile surfaces for texture.

ELEMENTS / Principles

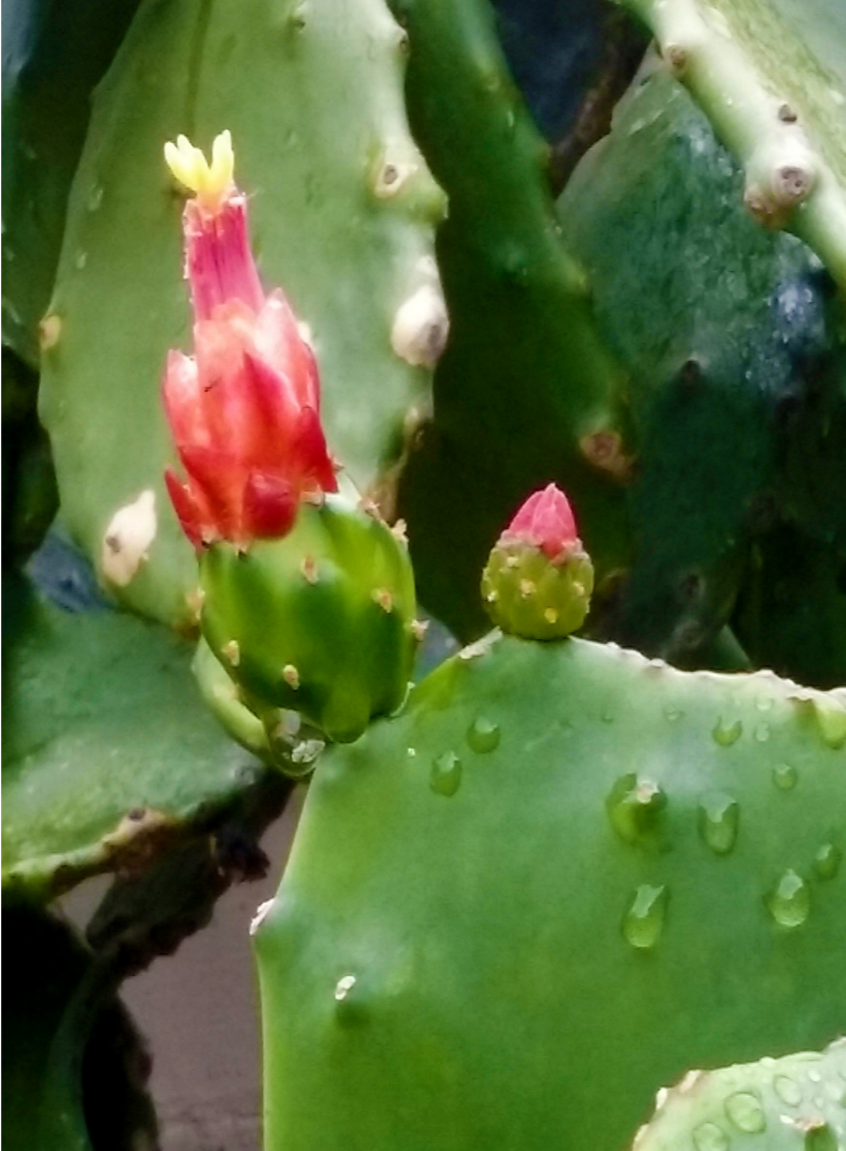

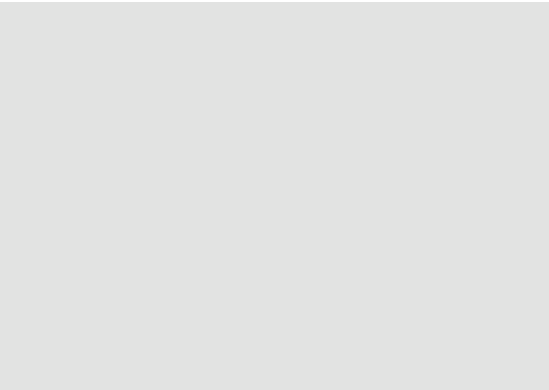

I selected this image because it shows the vibrancy and high intensity of green, orange, and brown.

SIZE/ elements

I chose these images because it portrays different scales of things.

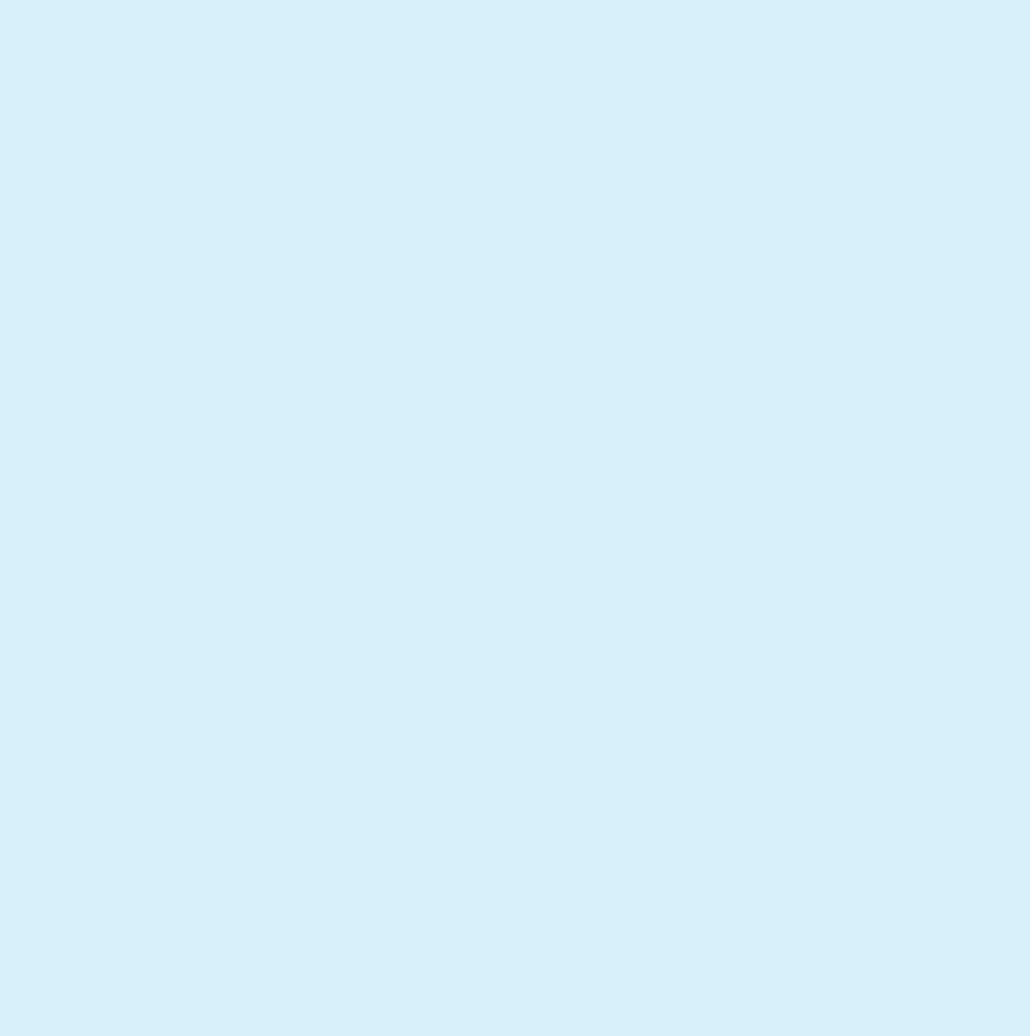

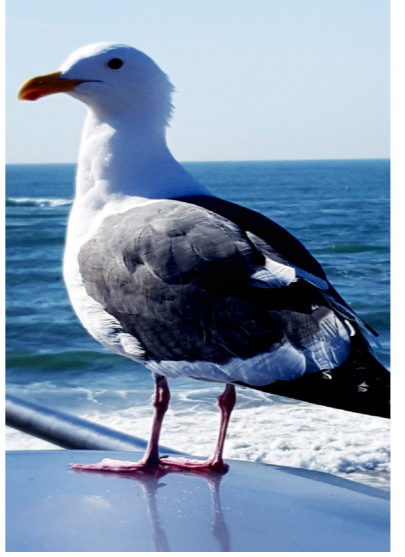

UNITY/ principles

ELEMENTS/PRINCIPLES

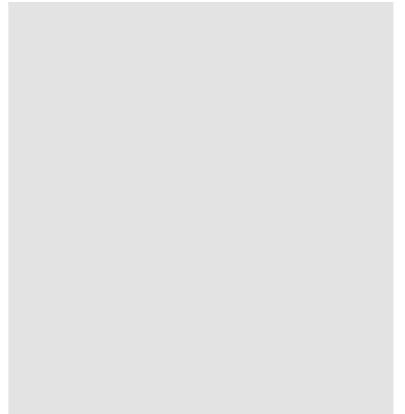

This artwork shows the unity of a pattern through repetition of organic and geometric shapes and colors bringing it together as a whole.

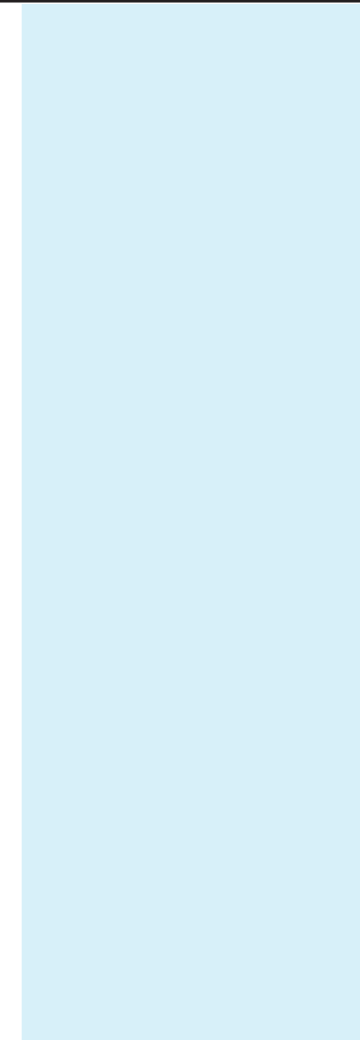

I decided to make emphasis on animals and show how captivating they are. Making my subjects larger gave my photographs dominance appearance that might bring to the attention of the viewer.

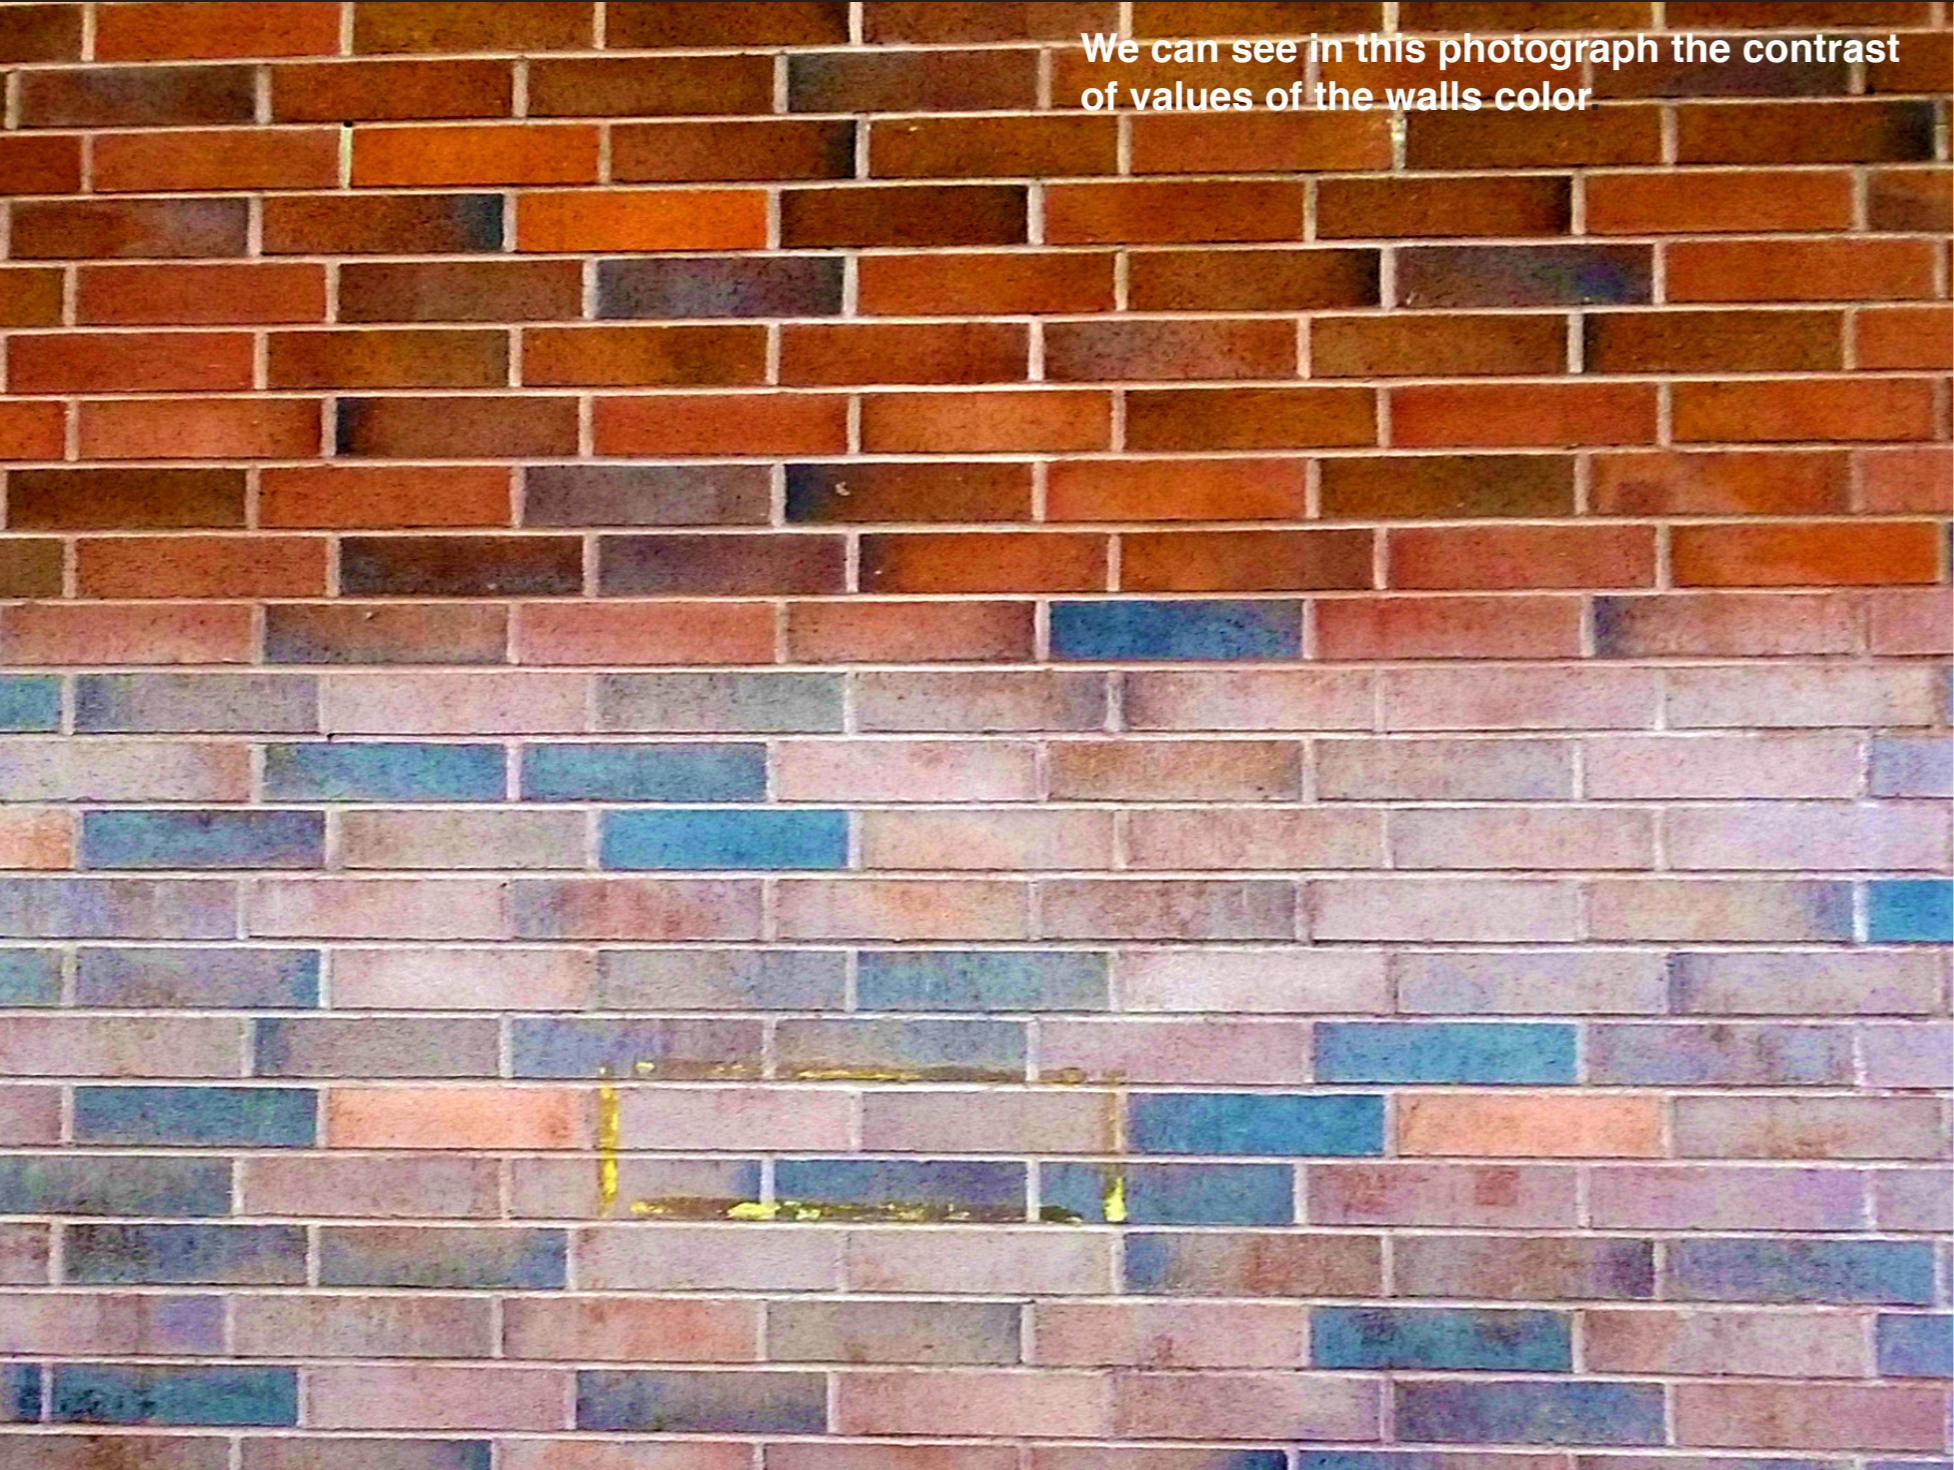

ELEMENTS/PRINCIPLES

In this abstract painting I played with color, lines, and shape to create balance.

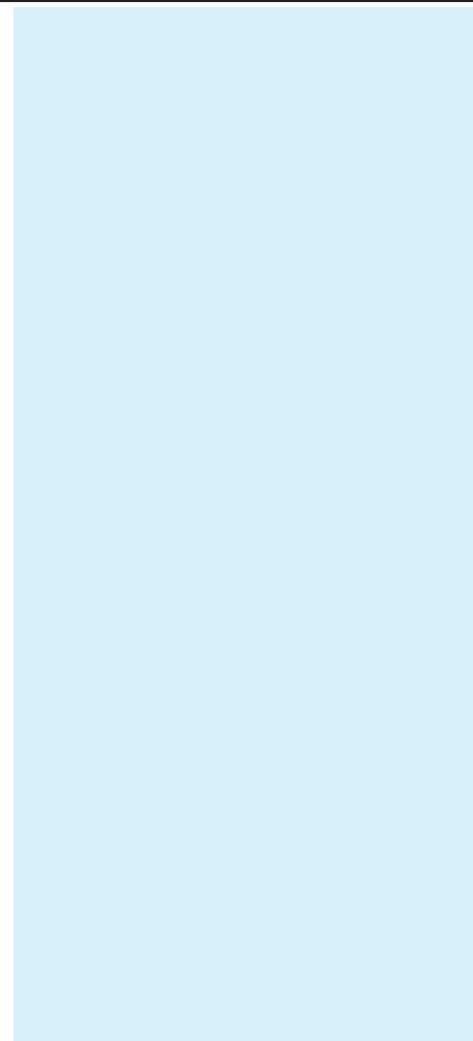

CONTRAST/ principles

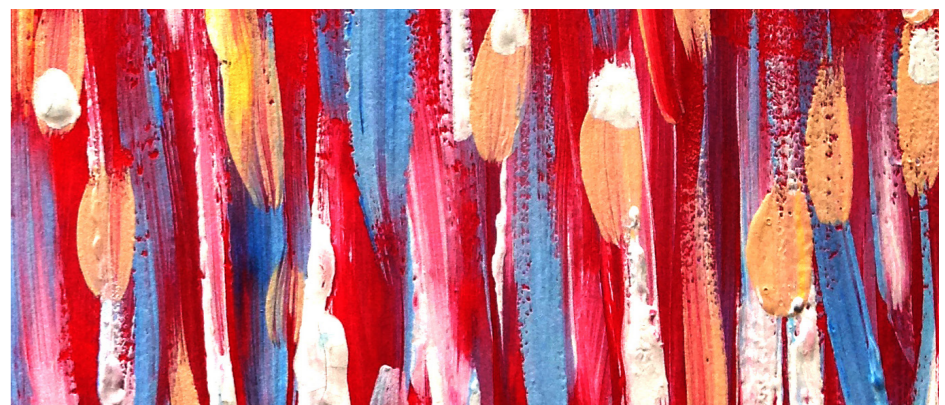

We can see in this photograph the contrast of values of the walls color

ELEMENTS/PRINCIPLES

RHYTHM/ principles

I selected these photographs because they show light motion and color motion through repetition and variation of elements with size, color, values, shape, and line. The activity that the images show for rhythm like spinning, dancing, and flowing is what made me choose these images.
