

Storyboard Research

Create 9 storyboard sketches based on 9 shots from a movie.

1. Watch a movie/tvshow/animation and pause the screen at your favorite moments. Look for shots with dynamic depth, asymmetry/symmetry, extreme light and dark contrast, interesting shapes, etc...

2. Draw 9 scenes (can be continuous or from different movies)
Get the basic shapes of the characters. Draw the basic shapes to define the background. Add tone for light and shadow. Add detail and refine or redo drawings to help communicate the idea.

3. Add a description about the type of SHOT and any other FILM TERMINOLOGY you can. (Try to add at least one descriptive term per shot)

3. Draw these drawings on paper. They can be any size.
Experiment with markers, pencils.

4. Scan your drawings and create a PDF.

5. PDF must be titled

Lastname_Firstname_Storyboard_Research_Project.pdf

tips: Look for the Rule of Thirds!
