

Cuts, Transitions, Camera Moves in Story board Pro

Create a minimum 3 shot animatic that uses the following:

A cut (think of the many different kinds of cuts possible)

A transition (dissolve, wipe, etc)

A camera move (use keyframes to move the camera across a shot)

Methods:

Review the notes on the blog.

You may use your drawings or you may use found images for practice.

It would be wise to use your own drawings so that you can start to work on your final animatic.

Extra:

Add sound to your shots!

Consider the way sound can add to the effectiveness of a shot.

Assignment Due:

When you have finished go to FILE > EXPORT > Movie

Save your file as

Lastname_Cuts_.mov
