Project 5 - After Effects - Repeater, Trim Paths and TrkMat
Use After Effects to create an animation that uses Repeater, Trim Paths or TrkMat.

Repeater
Make a shape
Center it's anchor point
Click the Layer Name
Use Repeater to add Shapes and adjust the Repeater Rotation Values
Use Keyframes on these values!

Trim Paths
Type some letters
Set the letters to have no FILL and only a STROKE
Right Click the Type layer to Create Shapes From Text
Click on One of the New Shapes created and use Trim Paths
Use the Keyframes to adjust it!
Experiment with Dashes and more variables

TrkMat
Create an animated Shape Layer
Add a Text Layer underneath and turn the visibility off on the shape layer
Use the Trak Mat Options to set it to Alpah Matte to use the Shape Layer as a mask
Experiment!

Consult the notes on the blog for more detailed instructions

Requirements
Minimum Resolution - 1000pxx1000px
5 seconds or more
.mp4 format
Animation must incluce one or all of the techniques above
Export as Lastname_After_Effects_Proj_5.mp4

Idea:
Make a title animation of your name that you can use for your portfolio!
