Project 8- After Effects- Keying & 3D
Use After Effects to 'key' green screen footage and experiment with 3D layers.

Shoot/Find and import footage with a character/actor against a green screen.
Use After Effects > Effects > Keylight+Key Cleaner+Adv. Spill Suppressor **to** make the background transparent.
Experiment with different background layers.

Write some text.
Enable the 3d function for the text.
Change the render settings to Ray Trace.
Rotate the type and add a Light Layer to adjust the shadow.

Experiment with:
Using Keylight effects on footage with Green Screen
Layering Keyed footage on images or other footage
Experiment with making your video layers 3d adjustable
Experiment with Ray tracing and 3d text

Consult the notes on the blog for more help.

Requirements
1280 x 720 px or 1080 x 1920 px
5 seconds (or more).

Export to Lastname_After_Effects_Key_3d.mov file
