

Project 8 - After Effects Null Controls & 3D Layers

Use AfterEffects to create a composition that uses Null Object Layers to control other layers and that uses 3D Layers.

Methods:

Create a composition with various keyframed objects. Use the Null Object layer to easily control/manipulate various objects.

Create a 3D cube by using 2D layers and activating the 3D option in the layer menu.

Experiment with adding additional compositions/videos to the 3D layers.

Possible Projects:

3D animated cube with video.

A portfolio project where you show case your work and use 3D layers to transition between projects.

Using Nulls and 3D layers in combination with any of our previous projects.

Requirements:

3-5 seconds

Must use Null Objects and 3D Layers

Use the 12 principles of Animation to guide your work

Export to Lastname_Null_3d_project.mp4
